To whom it may concern,

It has been our pleasure to use the medical transcription services of Digital Transcription Inc. Their work for us is first rate, their turnover is quick and we find them easy to work with. They stay on top of the laws and new technologies and are therefore HIPAA compliant.

In addition to all this, they can import your dictation narrative right into the EMR software you are (or soon will be) using.

Oh, and one other thing, when you need service—they are right there!

I strongly recommend that you give serious consideration to their services. I don't believe you will be sorry if you do; we haven't been.

Sincerely,

Robert G Schwartz, MD
